

THE COMMON GUILD

Visual arts: Projects / Events / Exhibitions

Anti-racism Statement / July 2020

As individuals and as an organisation, we recognise the injustices caused by structural racism and anti-Blackness, and the pressing need for change across society. This includes change within the arts sector in which we operate and our own practices.

We are endeavouring to adopt the means to address this in whatever ways we can through our work, continually reviewing and improving our policies and practices, with staff and board. This currently involves working on a dedicated action plan to structure and support our work in this area on an on-going basis.

We continue to value and support artists as essential voices and understand culture as a mechanism for connection and coming together.
